Technical Report No. 64.160.10.0765.01B

Rev. 00

Dated 2010-09-30

Client: Jiangyin PIVOT Decorative Materials Co., Ltd
PIVOT Industrial Park, 9th Huaxi Village, Huashi, Jiangyin, Jiangsu. China

Test Subject: The submitted sample was identified and described by client as:
Aluminium composite panel

Test Requested: **REACH**
Registration, Evaluation, Authorisation and restriction of Chemicals
(REACH)
EC No. 1907/2006
1.15 Substances of Very High Concern (SVHC) analysis based on the
Candidate List published by the European Chemical Agency (ECHA) on
October 28, 2008.

2. 14 Substances of Very High Concern (SVHC) analysis based on the
Candidate List published by the European Chemical Agency (ECHA) on
13 January 2010.

3. 1 Substance of Very High Concern (SVHC) analysis based on the
Candidate List published by the European Chemical Agency (ECHA) on
30 March 2010.

4. 8 Substances of Very High Concern (SVHC) analysis based on the
Candidate List published by the European Chemical Agency (ECHA) on
18 June 2010.

- Analysis based on LCMS, GCMS, GCECD, Headspace-GCMS, ICP-
OES/AAS, UV-VIS, XRF and HPLC-DAD.

Test Result: Please refer to next page(s)

Remark: The result relates only to the items tested.
Samples are tested as received.

This technical report may only be quoted in full. Any use for advertising purposes must be granted in writing. This report is the result of a single examination of the object in question and is not generally applicable evaluation of the quality of other products in regular production.

1 Description of the test subject

Sample No.	Color and description	Photograph
001	Silvery metal sheet with golden brushed coating	
002	Silvery metal sheet with silver brushed coating	
003	Black plastic between two metal sheet	

2 Order

2.1 Date of Purchase Order

2010-09-19

2.2 Receipt of Test Sample, Location

2010-09-19 Guangzhou

2.3 Date of Testing

2010-09-19 to 2010-09-30

2.4 Location of Testing

The testing was performed in TÜV SÜD Hong Kong Ltd. Chemical lab and the test results were reviewed at Jiangsu TÜV Product Service Ltd. Guangzhou Branch.

3 38 Items SVHC Test Results

3.1 15 Items SVHC Test Results

Analysis of the 15 substances of very high concern (SVHC) on the Candidate List for authorization, concerning Regulation (EC) No 1907/2006 as published on the European Chemicals Agency (ECHA) website in October 2008.

Analysis based on LCMS, GCMS, GCECD, Headspace-GCMS, ICP-OES/AAS, UV-VIS and XRF.

Test Item	CAS	SVHC classification	Result (%)	Reporting Limit (%)
			001+002	
Anthracene	120-12-7	PBT	N.D.	0.005
4,4'-Diaminodiphenylmethane	101-77-9	Carcinogen Cat.2	N.D.	0.005
Dibutyl phthalate	84-74-2	Toxic to Reproduction Cat. 2	N.D.	0.005
Cobalt dichloride *	7646-79-9	Carcinogen Cat.2	N.D.	0.010
Diarsenic pentaoxide *	1303-28-2	Carcinogen Cat.1	N.D.	0.010
Diarsenic trioxide *	1327-53-3	Carcinogen Cat.1	N.D.	0.010
Sodium dichromate *	7789-12-0 10588-01-9	Carcinogen Cat.2; Mutagen Cat.2; Toxic to Reproduction Cat. 2	N.D.	0.010
5-tert-butyl-2,4,6-trinitro-m-xylene (musk xylene)	81-15-2	vPvB	N.D.	0.005
Bis (2-ethyl(hexyl)phthalate) (DEHP)	117-81-7	Toxic to Reproduction Cat. 2	N.D.	0.005
Hexabromocyclododecane (HBCDD) and all major diastereoisomers identified (α – HBCDD, β -HBCDD, γ -HBCDD)	25637-99-4 3194-55-6 (134237-51-7, 134237-50-6, 134237-52-8)	PBT	N.D.	0.005
Alkanes, C10-13, chloro (Short Chain Chlorinated Paraffins)	85535-84-8	PBT; vPvB	N.D.	0.010
Bis(tributyltin)oxide *	56-35-9	PBT	N.D.	0.010
Lead hydrogen arsenate *	7784-40-9	Carcinogen Cat.1; Toxic to Reproduction Cat.1	N.D.	0.010
Benzyl butyl phthalate	85-68-7	Toxic to Reproduction Cat.2	N.D.	0.005
Triethyl arsenate *	15606-95-8	Carcinogen Cat.1	N.D.	0.010

Test Item	CAS	SVHC classification	Result (%)	Reporting Limit (%)
			003	
Anthracene	120-12-7	PBT	N.D.	0.005

Lead chromate*	7758-97-6	Carcinogen Cat.2; Toxic to Reproduction Cat.1	N.D.	0.010

3.3 1 Item SVHC Test Result

Analysis of the 1 substance of very high concern (SVHC) on the Candidate List for authorization, concerning Regulation (EC) No 1907/2006 as published on the European Chemicals Agency (ECHA) website in March 2010.
Analysis based on LCMS.

Test Item	CAS	SVHC classification	Result (%)	Reporting Limit (%)
			001+002	
Acrylamide	79-06-1	Carcinogen, Cat.2; Mutagen, category 2	N.D.	0.010

Test Item	CAS	SVHC classification	Result (%)	Reporting Limit (%)
			003	
Acrylamide	79-06-1	Carcinogen, Cat.2; Mutagen, category 2	N.D.	0.010

3.4 8 Item SVHC Test Results

Analysis of the 8 substances of very high concern (SVHC) on the Candidate List for authorization, concerning Regulation (EC) No 1907/2006 as published on the European Chemicals Agency (ECHA) website in June 2010.

Analysis based on GCMS, ICP- OES/AAS and UV-VIS.

Test Item	CAS	SVHC classification	Result (%)	Reporting Limit (%)
			001+002	
Trichloroethylene	79-01-6	Carcinogen, Cat.2;	N.D.	0.005
Boric acid *	10043-35-3 11113-50-1	Toxic for reproduction Cat.2	N.D.	0.010
Disodium tetraborate, anhydrous (also include the pentahydrate and decahydrate salts) *	1330-43-4 12179-04-3 1303-96-4	Toxic for reproduction Cat.2	N.D.	0.010
Tetraboron disodium heptaoxide, hydrate *	12267-73-1	Toxic for reproduction Cat.2	N.D.	0.010
Sodium chromate *	7775-11-3	Carcinogenic Cat.2; Mutagenic Cat.2; Toxic for Reproduction Cat.2	N.D.	0.010
Potassium chromate *	7789-00-6	Carcinogenic Cat.2; Mutagenic Cat.2	N.D.	0.010
Ammonium dichromate *	7789-09-5	Carcinogenic Cat.2; Mutagenic Cat.2; Toxic for Reproduction Cat.2	N.D.	0.010
Potassium dichromate *	7778-50-9	Carcinogenic Cat.2; Mutagenic Cat.2; Toxic for Reproduction Cat.2	N.D.	0.010

Test Item	CAS	SVHC classification	Result (%)	Reporting Limit (%)
			003	
Trichloroethylene	79-01-6	Carcinogen, Cat.2;	N.D.	0.005
Boric acid *	10043-35-3 11113-50-1	Toxic for reproduction Cat.2	N.D.	0.010
Disodium tetraborate, anhydrous (also include the pentahydrate and decahydrate salts) *	1330-43-4 12179-04-3 1303-96-4	Toxic for reproduction Cat.2	N.D.	0.010
Tetraboron disodium heptaoxide, hydrate *	12267-73-1	Toxic for reproduction Cat.2	N.D.	0.010
Sodium chromate *	7775-11-3	Carcinogenic Cat.2; Mutagenic Cat.2; Toxic for Reproduction Cat.2	N.D.	0.010
Potassium chromate *	7789-00-6	Carcinogenic Cat.2; Mutagenic Cat.2	N.D.	0.010
Ammonium dichromate *	7789-09-5	Carcinogenic Cat.2; Mutagenic Cat.2; Toxic for Reproduction Cat.2	N.D.	0.010
Potassium dichromate *	7778-50-9	Carcinogenic Cat.2; Mutagenic Cat.2; Toxic for Reproduction Cat.2	N.D.	0.010

Note:

1) * means:

Calculated concentration of cobalt dichloride is based on the identified cobalt by ICP-OES or the identified chloride by IC method.

Calculated concentration of bis(tributyltin)oxide TBTO is based on the identified tin by ICP-OES and TLC

Calculated concentration of diarsenic pentaoxide, diarsenic trioxide, lead hydrogen arsenate, triethyl arsenate and sodium dichromate are based on the identified element result (i.e. Arsenic, Lead, Hexavalent Chromium respectively).

Calculated concentration of Aluminosilicate Refractory Ceramic Fibres, Zirconia Aluminosilicate Refractory Ceramic Fibres, Lead sulfochromate yellow (C.I. Pigment Yellow 34) and Lead chromate are based on the identified element result (i.e. lead, chromium, silicon, aluminum and zirconium respectively).

Calculated concentration of Boric acid, Disodium tetraborate, anhydrous (also include the pentahydrate and decahydrate salts), Tetraboron disodium heptaoxide, hydrate, Sodium chromate, Potassium chromate, Ammonium dichromate and Potassium dichromate are based on the identified element result (i.e. boron, sodium, hexavalent Chromium respectively).

Reporting limit is evaluated for element (i.e. lead, cobalt, arsenic, hexavalent chromium, chromium, silicon, aluminum and zirconium)

Identity of the metal substances present in the article has to be further confirmed.

2) ^ means:

The SVHC consists of a diverse combination of chemical compounds fulfilling the definition of UVCB (substances of Unknown or Variable composition, Complex reaction products or Biological materials) under REACH regulation. Test result is calculated as per selected identifiers of the SVHC. The values are determined based on a reference anthracene oil and coal tar. Calculation is based on the worst-case scenario. Due to the UVCB nature the reported values may be regarded as semi-quantitative.

3) N.D. = Not detected (lower than reporting limit).

4) % means percentage by weight.

5) All reporting limit is based on homogenous material.

4 Remark

4.1 Definition of classification is listed in Annex 01 of this report in accordance with Directive 67/548/EEC Regulation (EC) No 1907/2006.

4.2 In accordance with Regulation (EC) No 1907/2006, any producer or importer of articles shall notify the European Chemicals Agency (ECHA), in accordance with Article 59(1) of the Regulation if :

- the substance is present in those articles in quantities totaling over one tone per producer or importer per year;
- the substance is present in those articles above a concentration of 0.1% weight by weight (w/w).

4.3 Article 33 of Regulation (EC) No 1907/2006 requires supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0.1% weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance.

4.4 The material is identified and described by client.

Annex 01

Classification Definition under Directive 67/548/EEC and Regulation(EC)1907/2006

Carcinogen Category 1:	<u>Substance known to carcinogenic to man.</u> There is sufficient evidence to establish a causal association between human exposure to a substance and the development of cancer.
Carcinogen Category 2:	<u>Substances which should be regarded as if they are carcinogenic to man.</u> There is sufficient evidence to provide a strong presumption that human exposure to a substance may result in the development of cancer. Generally on the basis of: - appropriate long-term animal studies; - other relevant information.
Mutagen Category 1:	<u>Substance known to mutagenic to man.</u> There is sufficient evidence to establish a causal association between human exposure to a substance and heritable genetic damage.
Mutagen Category 2:	<u>Substances which should be regarded as if they are mutagenic to man.</u> There is sufficient evidence to provide a strong presumption that human exposure to the substance may result in the development of heritable genetic damage, generally on the basis of: - appropriate animal studies; - other relevant information.
Toxic to Reproduction Category 1:	<u>Substance known to impair fertility in humans.</u> There is sufficient evidence to establish a causal relationship between human exposure to the substance and impaired fertility. <u>Substances known to cause development toxicity in humans.</u> There is sufficient evidence to establish a causal relationship between human exposure to the substance and subsequent developmental toxic effects in the progeny.
Toxic to Reproduction Category 2:	Substances which should be regarded as if they impair fertility in humans. sufficient evidence to provide a strong presumption that human exposure to the substance may result in impaired fertility on the basis of: - clear evidence in animal studies of impaired fertility in the absence of toxic effects, or, evidence of impaired fertility occurring at around the same dose levels as other toxic effects but which is not a secondary nonspecific consequence of the other toxic effects; - other relevant information. Substances which should be regarded as if they cause developmental toxicity to humans. There is sufficient evidence to provide a strong presumption that human exposure to the substance may result in developmental toxicity, generally on the basis of: - clear results in appropriate animal studies where effects have been observed in the absence of signs of marked maternal toxicity, or at around the same dose levels as other toxic effects but which are not a secondary non-specific consequence of the other toxic effects; - other relevant information.
PBT & vPvB:	Substances which are persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB) pose a particular challenge to the chemicals safety management. For these substances a “safe” concentration in the environment cannot be established with sufficient reliability.
